1928 Spring Planting Catalog

NURSEYMEN --- LANDSCAPE ARTISTS
BOLLING, ALABAMA

DIRECT FROM NURSERY TO YOU

OUR PLAN SAVES YOU MONEY

WE find that ordering by mail is quick, cheap and convenient, the goods coming to you direct by parcel post or express. Compare our prices with other prices. The goods are all raised here in Alabama, close to you, one or two days at the most from the nursery en route. If there is something that you want that you do not see in our catalog write us—we have it, and we will forward you prices.

We are prepared to handle large orders of any description. You simply mail your orders to us, enclosing your check or money order, and we will ship to you direct at the proper season for planting. State in your letter or on your order blank whether fall or spring planting is desired and your goods will reach you at the proper season.

In this catalog we have incorporated many useful suggestions on how to use and grow nursery stock. If there is any information you need that is not given here, write us, we will be glad to answer any inquiry.

HOW TO ORDER

Use one of our order blanks or letter, giving your town and street number, or if in the country, your R. F. D. and box number.

OUR GUARANTEE

We exercise the greatest care to keep our stock true to name and are always ready, willing and anxious at all times to replace, on proper proof, all stock that may prove otherwise or refund the money paid; it being mutually agreed between the purchaser and ourselves, however, that we shall not at any time be liable for any amount greater than the original price paid for trees and shrubs.

If goods are not accepted upon these conditions they must be returned and money will be refunded. All orders are accepted upon the condition that they shall be void should injury befall the stock from frost, hail, fire or other causes beyond our control.

QUALITY GOODS WELL PACKED

Our goods are all first quality. We do not ship seconds, thirds or culls. You get sturdy, well rooted plants which are almost sure to grow, provided you give them reasonable care. The stock is grown in Central Alabama and is hardy in this climate.

Our goods are packed in wet sphagnum moss and thoroughly wrapped either for parcel post or express shipments. In ordering from us you have the advantage of getting fresh stock delivered quickly. Stock does not suffer from long shipment or delay on the road.

We advise placing orders early. This gives us time to assemble and have your goods out on time. We accept orders at all times of the year, and wish to assure our many patrons who are now our customers, as well as new ones, that they will always find our goods, as in the past, first class in every respect.

To our new patrons—a trial order will convince you.

TERMS: Our terms are cash with order. Either a check or money order will be acceptable. We make no C. O. D. shipments. This policy enables us to offer the first quality stock at reasonable prices. This means a genuine saving for you.

ORDER EARLY

And make sure you get your entire order. Goods are packed in the sequence in which orders are received. This means that the earlier orders can be readily filled. Our stock may be depleted later in the season.

We take particular care in the growing and handling of our stock to be able to deliver good healthy plants in the best of condition for planting. Only those varieties particularly adaptable and suitable to this region are featured. Our products have given such satisfaction that every buyer has become a staunch friend and booster for our nurseries.

Special prices on large orders.

WE WILL HELP YOU PLAN *your* GROUNDS

Our Complete Landscape Service is just the kind the home owner needs

THE landscape service of the Bolling Farms Nurseries will help our clients in the solution of their landscape problems. This service includes consultation and plans; general landscape construction; the design and construction of gardens, playgrounds, pools, fountains, and enclosures. It also provides and sets out all necessary plant or other materials, and, what is equally important, has an organization which will maintain the landscaped grounds in condition.

For simple problems of landscape construction, a consultation is often times all that is necessary, and no charge is made for a consultation at the headquarters of the Bolling Farm Nurseries, at Bolling. In the case of larger, yet simple, landscape problems, where a plot plan, drawn to scale and giving accurate measurements of the ground to be landscaped, is furnished, our designers are usually able to give all the information necessary in the form of a plan, including full instructions as to how to carry it out.

For the landscaping of still larger properties, estates, etc., a carefully worked-out plan showing both present and future development is essential. Only in this way can

Have your grounds planned for beauty and enjoyment.

one be assured of harmony of detail, and a proper relation of the various features of the landscape plan. Complete plans of this description include a master plan, with working details of the various features embodied in the plan, and a complete planting key of all trees, shrubs, and flowers. The cost of plans is determined by the amount of time necessary to execute them.

CONSULT WITH US

An effective planting scheme will make your homesteads a source of pride and pleasure as well as increase its value. The services of our trained and experienced landscape designers are available for every homeowner. Let us know your problems and our best efforts will be given to their solution. Call on us or write to us today.

Beautiful gardens like the above add greatly to the value of a property far in excess of the amount spent for such development.

The billows of snowy white flowers of Van Houtte's Spirea always excite admiration.
A carefully arranged shrub planting gives a succession of flowering effects.

ORNAMENTAL SHRUBS

Add Beauty of Foliage and Flower

THE permanent value and beauty of shrubs are being more appreciated by people generally. The charm and grace they lend to home grounds is invaluable, and, if judicious selection is made, it is possible to have a continuous succession of bloom from early in April to the days when the frost again nips the flowers of the very latest to bloom.

In many cases it would be better to plant shrubs in groups of several to one side of the lawn instead of following the method of planting one in a certain place and spoiling the effect of the open lawn. In most cases, three, six, eight, or twelve of one variety should be used in a particular grouping. Several such groupings make an excellent border or foundation planting.

A small investment in plant material will increase the value of your property far beyond the actual amount invested, and your improvement is permanent. Instead of taking depreciation in planting, you receive larger returns in increased beauty and value every year.

There is joy and recreation in caring for the ground and making intimate friends with the plants and flowers. These associations will enrich your life and relieve the monotony of ordinary living. It is

not difficult to do or is not so expensive. You can get all the help you need from The Bolling Farms Nurseries. Plan to do a little each year and in the end, you will have the ideal home.

AMYGDALUS—Flowering Peach

AMYGDALUS (Flowering Peach). The double flowering peach trees are covered with a mass of highly colored flowers during March. They thrive and do well wherever other peaches grow.

Amygdalus persica albo plena.
(Double white flowering peach).

Amygdalus chrysanthemum rubro plena. This has an unusually fine double flowering pink bloom resembling a chrysanthemum.

Amygdalus persica rubro plena.
(Double red flowering peach).

Amygdalus persica rubro plena.
(Double pink flowering peach).

Prices:	Each	10
5-7 feet	\$1.50	\$12.50
4-5 feet	1.25	10.00
3-4 feet	1.00	8.50

Pink flowering Peach

* BUDDLEIA—Butterfly Bush

BUDDLEIA lindleyana. (Butterfly Bush). This is a rapid grower with small narrow leaves. Its

panicles of purple flowers are very effective when planted in masses and attract butterflies.

Prices:	Each	10
2 year	\$.60	\$ 5.00
1 year50	4.00

CALYCANTHUS—Sweet Shrub

CALYCANTHUS floridus. (Common Sweetshrub). Double flowers of chocolate color and very fragrant. It begins blooming in early April, lasting several weeks. Hardy and thrives in the shade.

Prices:	Each	10
2-3 feet	\$1.00	\$9.00
18-24 inches75	6.50
12-18 inches50	4.00

CYDONIA—Flowering Quince

CYDONIA japonica. (Flowering Quince). Spring shrubs having bright shiny green leaves and large, showy red flowers.

Prices:	Each	10
18-24 inches	\$.50	\$4.00
12-18 inches40	3.50

Buddleia, Oxeeye Butterflybush

DEUTZIA—The Deutzias

DEUTZIA crenata. Fuzzy pure white, single, profuse. Pride of Rochester double white, backs of petals pink. Fortunei, large double white with yellow centers. Candidissima. Snowflake, pure white, double, tall.

Prices:	Each	10
3-4 feet	\$.60	\$5.50
2-3 feet50	4.50
18-24 inches40	3.50

Deutzia gracilis. A dwarf low-growing bush about 3 feet tall. Covered in early spring with pure white flowers. Much used in foundation plantings.

Prices:	Each	10
18-24 inches	\$.80	\$7.00
12-18 inches60	5.00

FORSYTHIA—Golden Bell

FORSYTHIA fortunei. (Golden Bell). An upright growing golden bell. The golden yellow flowers appear very early in the spring, before the leaves. 8-10 feet.

Forsythia intermedia. (Border Forsythia). Has slender, arching branches, practically covered with golden bell-shaped flowers in early spring. 8-10 feet.

Forsythia suspensa. (Drooping Forsythia). Long slender drooping branches and dark green leaves. 6 feet.

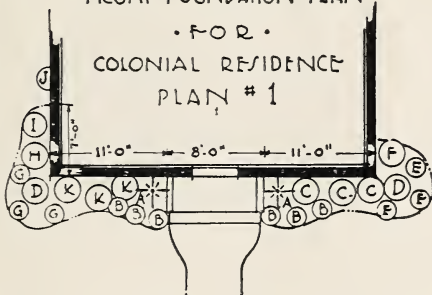

Prices:	Each	10
3-4 feet	\$.75	\$5.00
2-3 feet50	4.00
18-24 inches40	3.00

HAMAMELIS—Witch-hazel

HAMAMELIS virginiana. (Witch-hazel). Low growing tree with large foliage and showy yellow

The Beautiful Snowhill Hydrangea

KERRIA

KERRIA japonica Fl. Pl. (Double Kerria). Globe flower of spreading habit, having double yellow blossoms about 1 inch diameter. Effective for massing, attaining a height of about 5 feet.

Prices:	Each	10
2-3 feet	\$.75	\$6.50
18-24 inches50	4.50

LAGERSTROEMIA—Crepe Myrtle

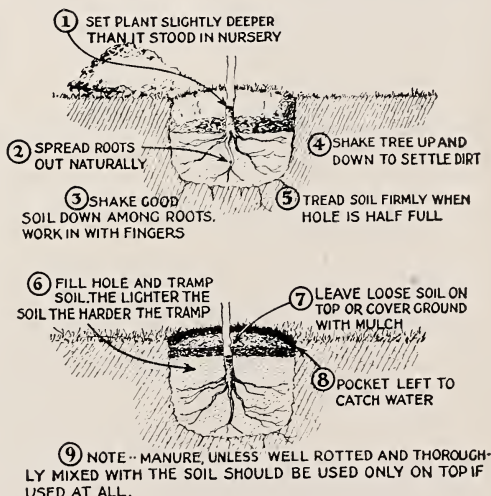

LAGERSTROEMIA indica. (Crepe Myrtle). A favorite free flowering shrub or small tree, blooming profusely throughout the summer. Flowers are beautifully fringed and borne in large clusters. Lavender, Pink and Red.

Prices:	Each	10
18-24 inches	\$.60	\$5.00
12-18 inches50	4.00

Hydrangea P. G.

HOW to PLANT Trees and Shrubs

**LONICERA—
Honeysuckle**

LONICERA fragrantissima. (Christmas Honeysuckle). Winter honeysuckle, sweet scented, pinkish-white flower appearing in February.

Lonicera morrowi. (Morrow's Honeysuckle). A Japanese variety producing in early April a profusion of white flowers, followed by a mass of bright red fruit.

Lonicera ruprechtiana. (Manchurian Honeysuckle). Flowers pure white, berries red and yellow, very showy.

Lonicera tatarica rubra. (Tatarian Honeysuckle). Beautiful, upright medium growth with purplish red flowers followed by crimson fruit.

Prices:	Each	10
3-4 feet	\$.60	\$5.00
2-3 feet50	4.00
18-24 inches40	3.00

PHILADELPHUS—Mock Orange

PHILADELPHUS. (Mock Orange). This is a handsome, vigorous shrub with large foliage and beautiful white flowers, blooming in profusion in April and May.

Prices:	Each	10
2-3 feet ..	\$.50	\$4.00
18-24 in. .	.40	3.00
12-18 in. .	.30	2.00

Philadelphus virginale.

A beautiful new variety of remarkable fragrance. Blooms about two weeks later than the common mockorange.

Price:	Each
2-3 feet	\$1.00

Philadelphus virginale.
Virginal Mockorange.

RHUS—The Sumacs

RHUS copallina. (Shining Sumac). A tall-growing shrub reaching a height of 20 feet. It has dark shiny green leaves, yellow flowers and crimson berries which remain on the shrub during winter.

Rhus glabra. (Smooth Sumac). The leaves of this shrub are dark above and white beneath. They turn a brilliant scarlet in autumn. Its flowers come in large panicles, and are followed by crimson clusters of berries, which remain during the winter. This makes an excellent shrub for massing, or as a single specimen, attaining a height of 10-15 feet.

Prices:	Each	10
5-6 feet	\$1.00	\$8.50
4-5 feet75	6.50

Rhus cotinus. (Purple Fringe or Smoke Bush). A peculiar low-growing shrub. Has delicate fringe-like or feathery flowers in summer. When in full bloom has the appearance of a cloud of smoke.

Prices:	Each	10
2-3 feet	\$2.00	\$17.50

Lonicera, Tatarian Honeysuckle.

SPIRAEA—The Spireas

A very important group of free blooming shrubs showing great variation in size, character and time of bloom. Very showy.

Spirea Anthony Waterer.

Free flowering, crimson blooms in rather dense corymbs. Compact. 3-4 feet. If blooms are cut off as soon as they begin to fade the plant will bloom the entire season. Makes a low-growing border.

Prices:	Each	10
24-30 in.	\$1.00	\$9.00
18-24 in.75	6.50

Spirea arguta. (Garland Flower).

Prices:	Each	10
30-36 in.	\$.75	\$6.50
24-30 in.60	5.00
18-24 in.50	4.00

Spirea billiardi alba. Flowers white produced in long dense panicles, blooms from May throughout the summer.

Spirea billiardi rosea. Brown, hairy branches, bright pink flowers, bloom during June and July.

Prices:	Each	10
3-4 feet	\$.60	\$5.00
2-3 feet50	4.00
18-24 inches40	3.00

Spirea douglasi. Flowers deep pink in dense panicles. Upright grower. 4-6 feet. Blooms during June and July.

Prices:	Each	10
2-3 feet	\$.50	\$4.00
18-24 inches40	3.00

Spirea prunifolia plena. (Double Bridalwreath). Long sprays of white, double flowers, practically covering the stem. 4-6 feet. Blooms in March.

Prices:	Each	10
4-5 feet	\$.75	\$7.00
3-4 feet60	5.50
2-3 feet50	4.50
12-18 inches40	3.50

Anthony Waterer Spirea.

Spirea vanhouttei. A graceful shrub, growing six to eight feet in height. Produces a profusion of single white flowers during the latter part of March. One of the most popular Spireas.

Prices:	Each	10
3-4 feet	\$.75	\$6.50
2-3 feet50	4.00

SYMPHORICARPOS

SYMPHORICARPOS racemosus. (Common Snowberry). A graceful shrub, growing four to six feet tall, slender drooping branches, flowers white, followed by clusters of white berries which remain upon the plant for months.

Prices:	Each	10
2-3 feet	\$.50	\$4.00
18-24 inches40	3.50

Symphoricarpos vulgaris. (Coralberry). A native shrub, growing naturally from New York to Texas; four to six feet tall. Purplish red berries are produced in great profusion. They remain upon the plant all winter, making it especially desirable for landscape planting.

Prices:	Each	10
2-3 feet	\$.50	\$4.00
18-24 inches40	3.50

VIBURNUM—Snowball

VIBURNUM tomentosum plicatum. (Japanese Snowball). Surpasses all other varieties in bloom and foliage when planted in partial shade.

Prices:	Each	10
2-3 feet	\$1.00	\$7.50

WEIGELA

WEIGELA. (Diervilla). Hardy, profuse-blooming shrubs of spreading habit. These are among the showiest of the garden shrubs, producing in early April great masses of showy flowers.

Amabilis (rose). Steltzner (pink).
Gigantiflora (white). Vanhoutte (pink).
Rosea.

Prices:	Each	10
3-4 feet	\$1.00	\$9.00
2-3 feet75	6.50
18-24 inches60	5.50

Weigela Rosea

Weigela hybrida candada. (Snow Weigela). Pure white; excellent.

Prices:	Each	10
2-3 feet	\$.75	\$6.50
18-24 inches60	5.50
12-18 inches50	4.50

Weigela hybrida Eva Rathke. Flowers deep carmine red; profuse bloomer and continues in bloom for a long time.

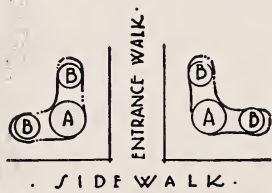

Prices:	Each	10
12-18 inches	\$.60	\$5.00

Weigela rosea variegata. Flowers similar to rosea, but foliage variegated.

Prices:	Each	10
2-3 feet	\$.75	\$6.50
18-24 inches60	5.50
12-18 inches50	4.50

Ampelopsis veitchi (Boston Ivy)

BROAD LEAVED EVERGREENS

for Year Round Beauty

THERE is no finer class of material for foundation planting, and all forms of general landscape planting than the broad-leaved evergreens. They have variety in form, color, texture and flower. In winter when other things are somber and dull looking, the broad-leaved evergreens lend warmth and cheer to the grounds.

ABELIA grandiflora. (Glossy Abelia). One of our most beautiful, popular and satisfactory Broad-leaved Evergreens. The graceful, drooping stems and branches are covered with dark, glossy leaves which in winter assume a metallic sheen. From the middle of May until frost this plant produces an immense quantity of tubular-shaped white flowers about an inch long which are borne in clusters. During the growing season it is advisable to pinch off the ends of the long shoots. This will make the plant dense and compact. For single specimens, for groups, or for a hedge we cannot too strongly recommend this plant. Hardy as far North as Philadelphia. Has also been successfully grown in sheltered positions in Massachusetts, and even when partially killed back, the young shrubs flower profusely the same season.

Prices:	Each	10
2-3 feet	\$1.00	\$9.00
18-24 inches80	7.00
12-18 inches65	5.50

Strong plants from open ground.

BUXUS sempervirens arborescens. (True Tree Box). We offer a fine lot of very compact, thrifty plants of our own growing.

Prices:	Each	10
12-15 inches	\$1.00	\$9.00
8-12 inches75	6.50

Buxus sempervirens suffruticosa. (True dwarf Box). This is the variety so extensively used in the old-time gardens for edging walks and beds. It is of very slow growth, and its ultimate height is from four to five feet. The plants should be set from three to four inches apart. We offer a superb lot of home-grown plants.

Prices:	Each	10
6-8 inches	\$.60	\$5.00
4-6 inches50	4.00
3-4 inches, two years40	3.00

EUONYMUS japonicus. (Evergreen Burning Bush). Leaves dark shining green. A fine plant for the lawn. Succeeds in almost any situation.

Prices:	Each	10
12-15 inches	\$1.00	\$9.00
8-12 inches75	6.50

LAUROCERASUS caroliniana. (Carolina Cherry Laurel). A valuable plant for screening; it shears well, and is free from

Specimen of Box Bush.

insect and fungus diseases. When transplanted it should be cut back severely.

12-18 inches, well-branched	1.50	12.50

Ligustrum japonicum standards. These trees have trained heads, similar to the Standard Bay Trees. Where a substitute for the Bay is desired for either tubs or open ground, the above-mentioned Standard Privet is most desirable, as the plant is perfectly hardy in the South. These plants are from open ground, but have been several times transplanted, and will be lifted and shipped with a ball of earth about the roots.

Prices:	Each

PRIVET—The Ideal Hedge Plant

PLANTING HEDGES

SET HEDGE TRIFLE LOWER THAN THEY WERE IN NURSERY TO GET A DENSE HEDGE AT BOTTOM
DIG ONE SIDE OF TRENCH STRAIGHT AND IN LINE, PLACE PLANTS AGAINST THIS SIDE TO GET A STRAIGHT HEDGE

We grade California and Amoor River Privet "heavy" and "light", according to the number of canes. The 18-24-inch and all up "heavy" grades carry four or more strong canes from the ground. The "light" grades in these sizes carry two or three strong canes.

The 12-18-inch "heavy" grade carries three canes or more and the 12-18-inch "light"

only two canes. All single stems are put in the "transplanting" grade.

ARBORVITAE *and Other Conifers*

THE Arborvitae (Biota and Thuja) are beautiful ever-green trees having a compact, symmetrical habit of growth. They are well adapted for formal plantings and as individual specimens and also in some instances as hedges.

Thuja occidentalis pyramidalis. Pyramidal American Arborvitae. This is the leading ever-green hedge plant, although equally attractive as a specimen or as a background for other plants.

Prices:	Each	10
24-30 inches	\$2.00	\$17.50
18-24 inches	1.75	15.00
12-18 inches	1.25	10.00

Thuja orientalis. Chinese Arborvitae. A tall growing hardy pyramidal tree with dark green foliage, holding its color throughout the winter.

Prices:	Each	10
4-5 feet	\$5.00	\$45.00
3-4 feet	3.00	25.00
2-3 feet	2.00	15.00
18-24 inches	1.50	12.50
12-18 inches	1.00	8.00

Thuja orientalis aurea nana. Berckman's Golden Arborvitae. This is one of the most popular arborvitae grown. It is dwarf, compact and symmetrical in habit. Excellent for small gardens and cemetery lots and also for window boxes and roses where it is very effective.

Prices:	Each	10
24-30 inches	\$4.00	\$35.00
18-24 inches	3.50	30.00
15-18 inches	3.00	25.00
12-15 inches	2.50	20.00

Thuja orientalis aurea conspicua. (Goldspire Arborvitae). Originated by P. J. Berckman's Company; of compact, erect and symmetrical habit. Foliage

intense gold; some of its branches being of a solid metallic tint, others suffused with green. As its name implies, it is most conspicuous; easily grown.

Prices:	Each	10
30-36 inches	\$4.00	\$35.00
24-30 inches	3.50	30.00
18-24 inches	3.00	25.00

FRUIT DEPARTMENT

PEACHES

The South's Leading Fruit

Mayflower. This is the earliest peach to bear although latest to bloom. Fruit is medium, slightly oblong and pointed. Red and juicy; semi-cling.

Arp Beauty. One of the best early peaches. Valuable for home and market. Yellow; semi-cling. Excellent shipper.

Greensboro. Fruit large and well colored. Flesh white and juicy. A heavy bearing semi-cling.

Carman. Large and well colored. Bears well and is a good shipper. Semi-cling.

J. H. Hale. Freestone. Medium. Flesh yellow. Fine quality.

Hiley Belle. Ten days earlier than Georgia Belle. Rich creamy white. Good market variety. Freestone.

Belle of Georgia. Large showy fruit, skin white, with red cheek. Flesh white, firm and of excellent flavor. Prolific bearer. Freestone.

Early Elberta. Golden yellow blending into red. Quality firmer than Elberta. An excellent bearer.

Elberta. Large golden-yellow striped with red; flesh yellow, juicy, sweet and rich; tree prolific, strong grower. Best market peach. Freestone.

Prices:	Each	10	100
4-5 feet	70¢	\$6.50	\$60.00
3-4 feet	55¢	5.00	45.00
2-3 feet	40¢	3.50	30.00

JAPANESE PERSIMMONS

Hyakume. A most desirable round, red-fleshed variety. Flesh bright orange-red. Keeps very late. Must be soft before being edible. Tree of moderate growth.

Okame. Dark red. Flesh yellow. Has few seeds and is rather astringent.

Tanenashi. Large conical; light yellow. Astringent until fully ripe.

Tanenashi Persimmon

Belle of Georgia Peach

Tamopan. Fruit bright orange-red. Seedless and of excellent quality.

Triumph. Yellowish-red. Fine grained; an excellent quality.

Zenji. Small. Flesh dark brown. Very sweet. Edible in September while still solid.

Prices: Each 80¢; per 10 \$7.50.

FIGS

Figs do well in this latitude. They are fine for preserves and are considered a delicacy when served fresh.

We have the following varieties: **Brown Turkey**, **Brunswick** and **Celeste**. Prices: each 50¢; per ten \$4.50.

MULBERRIES

The Mulberry is a splendid tree for shade. It provides an excellent fruit for hogs and chickens.

Varieties: **Downing**, **Hicks**, **Everbearing**, **Merritt** and **Stubbs**. Prices: each 60¢; per 10 \$5.50.

DEWBERRIES

Lucretia. One of the best for this section. Hardy and very productive. Fruit sweet and luscious.

Young's. A most promising variety.

Prices: Each 10¢; per 100 \$9.00.

If you don't see what you want, write us. We no doubt have it and can supply you. Do not hesitate to write and ask for special prices on quantities or for information on any planting subject.

MAKE MONEY

By Growing

PECANS

WE SPECIALIZE ON PECANS

OUR Nursery is ideally situated for quantity production of pecan stock. Due to this and the ever-increasing popularity of the Pecan nut for commercial growing and home use, we offer a fine line of pecan trees in the various sizes in any quantity desired. We offer the best varieties, having large size, good flavor, thin shell and easy cracking qualities. They are hardy and satisfactory.

PECAN ORCHARDS PAY

Give a pecan orchard the same care and attention given a corn or cotton crop and the results will repay you many fold. The pecan is long lived. When the trees are cultivated, fertilized and properly pruned they should bear in five years, bear paying crops at eight years and should produce 16 to 20 pounds of nuts per tree in ten years.

WHEN AND WHERE TO PLANT PECANS

A deep, fertile soil, sufficiently porous to admit of free root growth, well drained, yet by no means dry, is considered best adapted to pecan culture.

Trees should be set out 60 feet apart or twelve to the acre. It is advisable to dynamite holes and set in the trees as soon after they become dormant as possible. December or January are the best months, as the roots will have time to become firmly set before the spring growth begins.

TREES TO THE ACRE

- 27 trees to acre, planted 40 ft. x 40 ft.
- 22 trees to acre, planted 45 ft. x 45 ft.
- 18 trees to acre, planted 50 ft. x 50 ft.
- 15 trees to acre, planted 54 ft. x 54 ft.
- 12 trees to acre, planted 60 ft. x 60 ft.

VARIETIES

Schley. Probably the best known and most widely disseminated variety. Shell very thin, kernel plump, quality very rich and flavor excellent. A regular bearer.

Stuart. One of the more extensively planted varieties. Medium to large in size. Shell of average

thickness, plump, of good quality and sweet flavor.

Success. A widely planted variety. Shell of medium thickness, fine flavor. Consistently good bearer.

Frotscher. Widely disseminated, of large size and very thin shell.

Moneymaker. Medium size, oblong, rounded, cracks easily, kernel rich, plump and full. An early and heavy bearer.

OUR REASONABLE PRICES

5-6 ft.	1.30 each	1.10 each	1.00 each

HOW TO PLANT PECANS

Keep roots covered with moss or wet sacks at all times before planting. The roots must not dry out. Dig hole for tree before exposing roots. Hole should be 2 feet wide and deep enough to set tree trifle lower than it

stood in nursery. When hole is dug, take one tree and cut off ends of broken roots with sharp knife. Cut off part of tap root so the tree will force lateral roots. Fill hole half full around roots with well pulverized top soil enriched with either the proper amount of well rotted stable manure, bone meal, or high grade fertilizer, thoroughly mixed with the soil.

Pack earth firmly as the hole is filled, but leave two inches of loose soil on top. When soil is very dry, pour water in hole when partly filled. Trees over four feet should be cut back to four feet height after planting. Be careful not to break eyes of trees when handling. Keep trees cultivated and properly pruned. Between the rows, you may plant cotton, peas, potatoes, melons, or any cover crop for several years, but never small grain. When trees go into bearing, plant and turn under a crop of peas, soy beans, vetch or clover.

Excellent results are obtained in planting Pecans with dynamite—one-half pound of dynamite placed two feet below level is ample.
